

Waagene Purifier with one main filter for pressure free systems

Description

Applications

Hydraulic systems such as hydraulic presses, compactors, ro-ro equipment etc. It can also be installed on an IBC tank for cleaning oil, such as freezer compressor oil or in other situations where it is not possible to permanently instal the unit on the system. You will then operate with two sets of oil, one in the external tank being cleaned, and the other in use on the equipment.

Specifications

- **Capacity:** 600 litres/24 hour
- **Oil volume:** Up to 3,000 litres
- **Oil type:** All hydraulic and lubricating oils
- **Viscosity:** 32 - 320
- **Max. pressure in:** No back-pressure
- **Filter cartridge use:** About 4 a year in continuous use, and under normal conditions
- **Power consumption:** 2,400 watt, 230 volt, 16 amp circuit
- **Connection:** 3/8" BSP external thread
- **Warranty:** 12 months
- **Weight:** 35 kg
- **Dimensions:** 64 x 45 x 47 cm (H x W x D)
